Computer Science Capstone Project Series (Academic Year 2025 – ID66)

CS Capstone Project Schedule

A. Pre-CS Capstone (1/2025) Schedule: Before CSC498 Registration

Date	Activity
22 Sep 2025	Submit project group members
30 Sep – 7 Oct 2025	Submit Research Integrity (RI) certificate
9 Oct 2025 16:45 – 18:00, LX12/1	Explain the capstone project processes, grouping, schedule, and other details
10 Oct 2025	Submit three potential project ideas
13 – 22 Oct 2025	- CS Lecturers select three preferred projects - Student groups initiate contact to finalize matching
24 Oct 2025	Announce the matched supervisor for each group
27 – 31 Oct 2025	- Consult with CS lecturers - Write the 1st draft of project profile **Note:** For groups whose topics have not been selected by CS lecturers, students must choose and consult with the available CS lecturers.
31 Oct 2025 (Exam 2)	Last day to submit the 1st draft of project profile
3 – 21 Nov 2025	- Consult with your pre-selected advisor - Revise the project profile
26 Nov 2025	Announce the project topic and advisor approval
19 Dec 2025	Submit the updated project profile with advisor approval

B. CSC498 CS Capstone Project I (2/2025)

CSC498 Computer Science Capstone Project I **2 Credit**
Pre-requisite: Valid RI certificate and CSC291 Computer Science Integrated Project II

Course Description: This course is the first portion of a project- based individual or group study investigation. Students will work under the supervision of faculty member(s). Each group must choose to conduct a systematic investigation of a computer science problem of its choice. Project topic must require a substantial background in computer science and the applications of studied concepts and techniques.

Course Learning Outcomes (CLOs)
At the end of the course, the students can:

1. Prepare proposal of capstone project, including an appropriate feasibility study and proper project planning. (*PLO.1a, PLO.1c, PLO.3, PLO.4*)
2. Produce requirement, analysis, and design of the software and its system. (*PLO.1a, PLO.1b*)
3. Develop and deliver a good quality formal presentation. (*PLO.2b*)
4. Plan interactions (e.g., virtual, face-to-face, shared documents) with others in which they are able to get their point across and are also able to listen carefully and appreciate the points of others, even when they disagree, and are able to convey to others that they have heard. (*PLO.2*)
5. Examine appropriate measures used to communicate with stakeholders involved in a project. (*PLO.1a*)
6. Compare and contrast various collaboration tools. (*PLO.1d*)

Schedule

Date	Activity
16 Jan 2026	Submit the project proposal
19 Jan 2026	- Start consulting with your advisor - Start writing Chapter 1-2 report and submit it to the advisor for approval
16 – 20 Feb 2026 (Exam 1 Period)	**Feasibility Study Presentation**
27 Feb 2026	Submit complete Chapter 1-2 at MS teams
2 Mar 2026	Start writing Chapter 3 report and submit it to the advisor for approval
21 – 29 May 2026 (Exam 3 Period)	**Design Presentation**
11 June 2026	Submit complete Chapter 3 at MS teams

C. CSC499 CS Capstone Project II (1/2026)

CSC499 Computer Science Capstone Project II **3 Credit**
Pre-requisite: CSC498 Computer Science Capstone Project I

Course Description: This course is a continuation of CSC 498. Students must complete the coding, testing, and deployment phase, submit formal documentation, and pass the oral examination and project presentation of their projects. Students will work under the supervision of faculty member(s).

Course Learning Outcomes (CLOs)
At the end of the course, the students can:

1. Develop a completed software product that is ready for deployment, with proper testing of its system. (*PLO.1b, PLO.1c, PLO.1d, PLO.4a*)
2. Develop and deliver a good quality formal presentation. (*PLO.2b*)
3. Plan interactions (e.g., virtual, face-to-face, shared documents) with others in which they are able to get their point across, and are also able to listen carefully and appreciate the points of others, even when they disagree, and are able to convey to others that they have heard. (*PLO.2*)
4. Examine appropriate measures used to communicate with stakeholders involved in a project. (*PLO.1a*)
5. Compare and contrast various collaboration tools. (*PLO.1d*)

Schedule

Date	Activity
3 Aug 2026 (Week#1) 10:00 – 12:00 [Online]	Training on using LaTeX template for CS Capstone project document
14 Sep 2026 (Week#7) 13:00 – 17:00	**Project progress presentation for committee (Alpha Test)**
15 Sep 2026 (Week#7)	Start writing Chapter 4-5 report and submit it to the advisor for approval
15 Sep - 5 Oct 2026 (Week#7-10)	Fill out the project information and upload project proposal on the SIT Portfolio website at https://seniorproject.sit.kmutt.ac.th Prepare the following resources for uploading on the SIT Portfolio: • Poster (Size: 1920 x 1080 Pixels) • Group Member (Size: 800 x 600 Pixels) • A brief description of your project • Tools & Techniques used (e.g., front-end, back-end, DB, infra, PM, etc.) • Project Video Demonstration link • Advertising Highlights (e.g., system architecture, features, etc.)

Date	Activity
12 October 2026 [Online]	Explain details of the D-Day event
14 – 20 October 2026 (Exam#1 Period)	Presentation to advisor for consideration to participate in D-Day event (Beta Test)
16 Nov 2026 09:00 – 16:00	**D-Day for presentation to public and committee**
17 Nov 2026	Start writing complete capstone project report and submit it to the advisor for approval
30 Nov – 11 Dec 2026 (Exam#3 Period)	**Final presentation for project groups don't participate D-Day event and project groups that did not pass the evaluation on D-Day event**
18 Dec 2026 (1 week after the final exam)	Last day to submit completed capstone project document in PDF file format and the installation instruction video for approval at MS Teams Please use LaTeX template to create completed capstone project document in PDF file format. The video must strictly follow the steps written in the Readme file and must show proof of successful installation and operation.
23 Dec 2026 (2 days before submitting grade)	**CSC499: Last day to submit everything to get a grade without penalty at SIT Portfolio website** 1. Completed capstone project document in PDF file format 2. Source Code 3. Database 4. Manual file in Microsoft Word file format 5. Readme.md file containing - Requirements for project installation (Hardware, Software, Library, etc.). - Information of students such as name-surname, address, email, and telephone number. 6. Installation instruction video
